Correction to: Racial and Ethnic Differences in the Association between Classical Cardiovascular Risk Factors and Common Carotid Intima-Media Thickness: An Individual Participant Data Meta-Analysis

In the article by Engelbert A. Nonterah et al, “Racial and Ethnic Differences in the Association Between Classical Cardiovascular Risk Factors and Common Carotid Intima-Media Thickness: An Individual Participant Data Meta-Analysis,” which published online July 25, 2022 (*J Am Heart Assoc.* 2022;11:e023704. DOI: [10.1161/JAHA.121.023704](https://doi.org/10.1161/JAHA.121.023704)) and was included in the August 2, 2022 issue of the journal, a correction was needed.

In the Abstract, in the Methods and Results section, the authors mistakenly wrote that they conducted a 2-stage individual participant data meta-analysis: “Ethnic differences in the association of established cardiovascular risk factors with CIMT were determined using a 2-stage individual participant data meta-analysis with beta coefficients expressed as a percentage using the White population as the reference group.” This has now been corrected to read “Ethnic differences in the association of established cardiovascular risk factors with CIMT were determined using a 1-stage individual participant data meta-analysis with beta coefficients expressed as a percentage using the White population as the reference group.”

The authors regret the error.
